

George saved more than 10% on Waste Management with ED

Numark has again negotiated a fantastic deal as part of our ongoing Enhanced Discounts (ED) programme for collection of all your waste. GPT Waste Management can manage all your general mixed and clinical waste at competitive prices.

With full audit trail and monthly reporting to support all work undertaken, GPT aim to take the hassle out of waste disposal. You don't need two separate bins for cardboard and mixed waste with GPT you only require one bin for all waste.

All waste collected would be subject to a Recycling Program ensuring that waste is recycled where possible.

Prices start from as little as £7.00 per empty and there are no hidden costs. One price includes the collection, disposal and processing of the waste as well as rental costs and duty of care paperwork. For more details on price and bin sizes refer to the pull out section in Scripts under Enhanced Discounts or log onto www.numarknet.com

But don't take our word for it. Here is what George Wickham from Luxtons Pharmacy has to say about GPT Waste:

“ *Paying for something like waste collection, that we used to get free with our ever rising business rates, is something that always makes me angry! So when looking for a waste collection solution my priority is as cheap as possible and with minimal effort on my part.*

GPT waste sent me a quote by email on the day I asked for one, and it was more 10% cheaper than our local waste collection provider!

We arranged for a 1100 litre bin to be emptied weekly which saved time on having my staff separate glass / cardboard / plastic etc.

To date the bin collection has been faultless and the payment by direct invoicing from Numark HO painlessly efficient.

I would not hesitate to recommend them to other members **”**

Numark's Enhanced Discount programme offers fantastic discounts with over 30 suppliers – are you missing out?
